BIRCHVILLE
GARDENS

PLAINVILLE, CONN.

To Our Customers and Friends:

In keeping with our policy we are again offering a catalogue that we feel sure will be of value to its readers. We have spared no effort to make it comprehensive, concise, educational, and interesting.

Our selection of varieties is offered only after careful observation and consideration, and we feel sure our choice will please the majority of specialized glad lovers.

We have been asked to continue the chatterbox review. So again, this season, we will try to evaluate some of the newer varieties we are growing. This review is based on our own observations in the fields at Birchville Gardens. Our soil is sandy and the performance of some varieties may differ in other types of soil or in different climates. We give you this chatterbox review, however, with the hope it will be interesting reading and in some small way assist you in the selection of varieties.

WHITE — The white section, in our opinion, is the most important and we believe that in any commercial planting at least 35% may well be made of this popular color. While we do not list many whites, nevertheless this still is one of the strongest classes. Commercial men can well consider the merits of Florence Nightingale and Mother Fischer, two of our finest varieties. One of the pleasant surprises in 1957 was Texas White, rather late but it makes nice tall spikes right down the row. White Excelsior still continues to produce good tall early spikes with florets of heavy substance. For the show fan a good spike of Sierra Snow is still hard to beat. In the 401 division the early Carmine Eyes and White Sails are not only good show varieties, but also among the best cutflowers.

CREAM — In the cream class we had one of the most pleasant surprises of the year in Angels Serenade. The ethereal beauty of its florets make it a connoisseur's glad par excellence. Lorelei is still the leader in making grand spikes. This glad has charm and will become a favorite in the florist trade as well as one of the very best show glads. The giant of this class is Good Morning, growing so consistently that every spike is of show caliber. For home arrangement and artistic floral work we recommend Genoveva, which, we are sure, will please you.

YELLOW — The ever popular yellow class has shown much improvement in the past five years. Gary is certainly the best for cutflower growers, makes grand spikes that handle very well and has wonderful keeping qualities. Fort Knox, always a favorite with us, is excellent for both showing and cutting. Golden Boy, certainly an easy winner in the 300 class, has good color and grows well. Prospector still rates as one of the most beautiful glads. Forsythia and Gold Bank, both with a green cast, are also good growers and among the best for cutting. The newer Paragon, with its tall spikes and with six to eight open on a long flowerhead, should do a lot of winning at the shows. Conrad, which reminds us of old Spotlight, is one of the finest growers, and should become a good late cutter.

BUFF — Viva, the newest addition to the buff class, makes grand spikes that will delight anyone. Golden Palominos, always a show contender, has a lot of friends. A. B. Coutts, rather late but grand for cutting, is certainly one of the best. In Patrol we have one of the great glads that has won about every award one could think of. While there are not many in this class, all are lovely creations and rate a place in your garden.

ORANGE — Gay, bold Caballero, will capture your heart as it is one of the most striking variety grown. Debbie, a true orange, is heavily ruffled and strikes a new note in color brilliance.

SALMON — Our new addition to the salmon class is Liberty. Its record speaks for itself — a grand champion many times with but a small amount of stock released. Salmon Queen, certainly well named, is a tall consistent grower that, in our opinion, will become one of the leaders for show and cutflower growers. King Size makes huge spikes but has little else to recommend it. Delight is not only a color marvel, but also has beauty of florets and is very heavily ruffled. Should rate as one of the most beautiful glads grown. Tabarin, one of our favorites, is a flashy novelty that consistently makes good spikes. We are strongly impressed with the European variety, Flower Dream. This looks like a good commercial prospect.

SCARLET — Firelight will be greeted as the earliest scarlet and a real money maker. Hilltopper is a fine tall grower that is large and flashy and should rate a spot in everyone's garden. Allegretto, always tall with good bright color, is one of the best cutters. Sans Souci was, as usual, outstanding. This stellar variety cuts right down the row and I have yet to see a crooked spike. Gregor Mendel has an unusual smoky cast and receives much praise from visitors to our gardens.

LIGHT PINK — In the light pink class, Target is distinguished by its unusually long flowerhead. Countess makes long tapering spikes with nice stems, making it especially valuable for basket work. Pink Pride, the giant of this class, is one of the most dependable cutters. Pink Diamond is a pastel beauty that has lots of friends. Target, Countess, Pink Pride and Pink Diamond are also very good show varieties. Gina, the newest, is, in our opinion, not only one of the most beautiful varieties, but also one of the best.

MEDIUM AND DEEP PINK — Coronation is the answer to a florist's prayer. Beautifully ruffled, with seven open and six buds in color, which greatly enhances its beauty, it is the best in this class. Boudoir, the giant of this class, produces a robust plant and the color is unusually good for such a large variety. We are greatly impressed with Boudoir and feel sure we will hear a lot from this one. Alfred Nobel, with its large white throat, really commands attention.

LIGHT & DEEP RED — Two very important red glads, Early Red and Red Radiance, are well established in the commercial fields. Swiss Flag is somewhat like Carnival, but is far superior, a very flashy glad and one we rate highly. Red Tape, the big fellow of this section, is distinguished by its long heads and height. Red Pepper is one of the finest all-around varieties and is being overlooked. For unsurpassed color, Senator will please anyone. This variety has a velvet sheen found in no other glad. Harrisburger, rather late, is still hard to beat at the shows. The new Tosto is very early and only for this reason will become very popular.

BLACK RED — In the black red group Ace of Spades has become the leader. It has a beautiful needlepoint type of floret and, in addition, is heavily ruffled. Blackpool, in our opinion, has the finest color and is very popular with visitors. Black Joe is very early with splendidly ruffled florets set off by a narrow silver edging. Attaturk, the darkest of all the glads, is almost black.

LIGHT & DEEP ROSE — Some good old varieties are in this section, Andrena, Elmer's Rose, and Traveler are all good cutters. Lori Dee is heavily ruffled and is one of the tallest glads grown. Richland Rose, also well ruffled, produces good spikes with up to 10 open. Rosita is a favorite with everyone that has ever grown it. Rosy Veil, introduced as a rosy Spic & Span, has become very popular with show fans. Wild Rose, from Noweta Gardens, will certainly make a name for itself in the cutflower fields.

LAVENDER — In the lavender section, Princess has become one of the leaders. It has color and heavy texture combined with strong growth. Monona, a newer one, is somewhat like Elizabeth the Queen, minus the blotch, and a better all around grower. Tyrone, one of the few true lavenders, is very consistent as a cutflower and makes good tall spikes. Elizabeth the Queen and Gail are recommended for cut flower growers.

PURPLE — Karen certainly is the leader in this class for all around use. It is distinguished by long flowerheads and wonderful keeping qualities. Purple Burma has heavy ruffling and is a favorite with many. The older King David, The Rajah, and Wonder Boy are all good varieties. Mable Violet, from Holland, has unusually fine color and should have a host of friends.

VIOLET — Blue Peter is now the big noise in the violet class, often called blue glads. Makes very good spikes from small bulbs but only capable of opening five. Will become very popular because of its healthy bulbs and easy growing habits. Blue Conqueror has fine color, good placement and good stems which has been lacking in blue glads. This also makes good healthy bulbs. Blue Goddess and Mojolica, both from K & M, are worthy additions to this weak class. Salman's Sensation, tallest and most popular at present, has good color, but rather weak stems. Violet Charm, the old standby, is certainly one of the best for show purposes. Can be Grand Champion at any show.

SMOKY — Tan-Glo is still tops as a show smoky. It will hold 10 open easily in the field. Copper Lustre and Prairie are two wonderful varieties for arrangements. Magic Beauty is very unusual. Oriental Splendour is, in our opinion, one of the finest smokys available. Sure wish we had more stock.

It would be impossible to conclude these comments without a word about the green glads. Green Ice will certainly be grown by the million just as soon as stock is available. Shamrock, while not so green, is very early and is a good grower that should be valuable for early cutflowers. Green Woodpecker opens 10 easily and is certainly going to be hard to beat at the shows. I will conclude these comments with reference to the Butterfly Varieties of K & M. Their rich color and bold blotches will endear them to your heart and bring added joy to your 1958 glad-garden.

In the foregoing paragraphs we have endeavored to give you an honest, concise appraisal of some of the newer varieties as well as the best recent introduction. We often wonder whether non-productive pages (pages not containing price list) are of any value to a catalogue and its mission. To this there is no conclusive answer, but we have long felt that interesting and instructive reading, together with good pictures and service features, are just as much a part of a successful catalogue as the actual price list itself. We certainly would like you to express an opinion as to whether or not we should continue chatterbox review each season.

We welcome your visits to Birchville Gardens to inspect the fields.

We are especially anxious for you to inspect the bulb house in which we take special pride.

Our sincere wish is for your success and happiness in your 1958 garden.

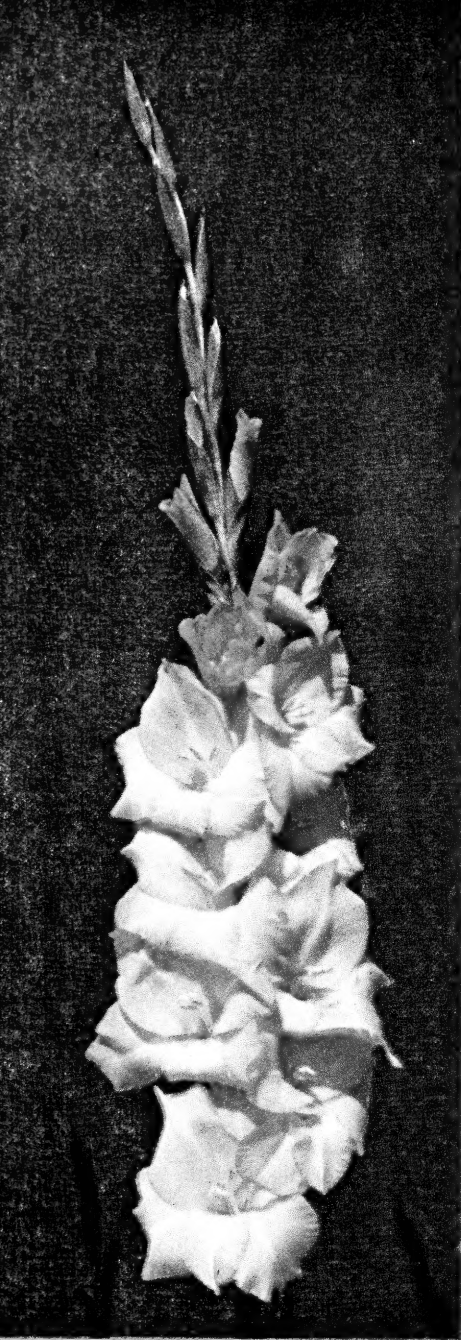

Sincerely,

James A. Milo

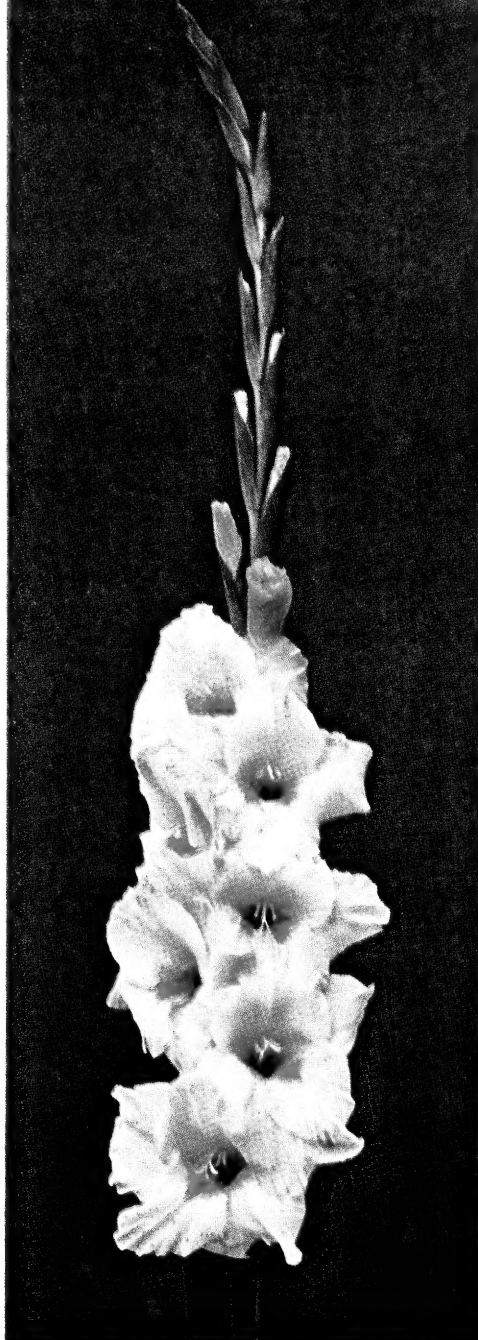

— OUR COVER PHOTO —

Seedling No. 652-625. Watch for this beautiful sensational new cream introduction in 1959. Easily makes huge spikes, even under adverse conditions. Those who have seen this glad are anxiously awaiting its introduction.

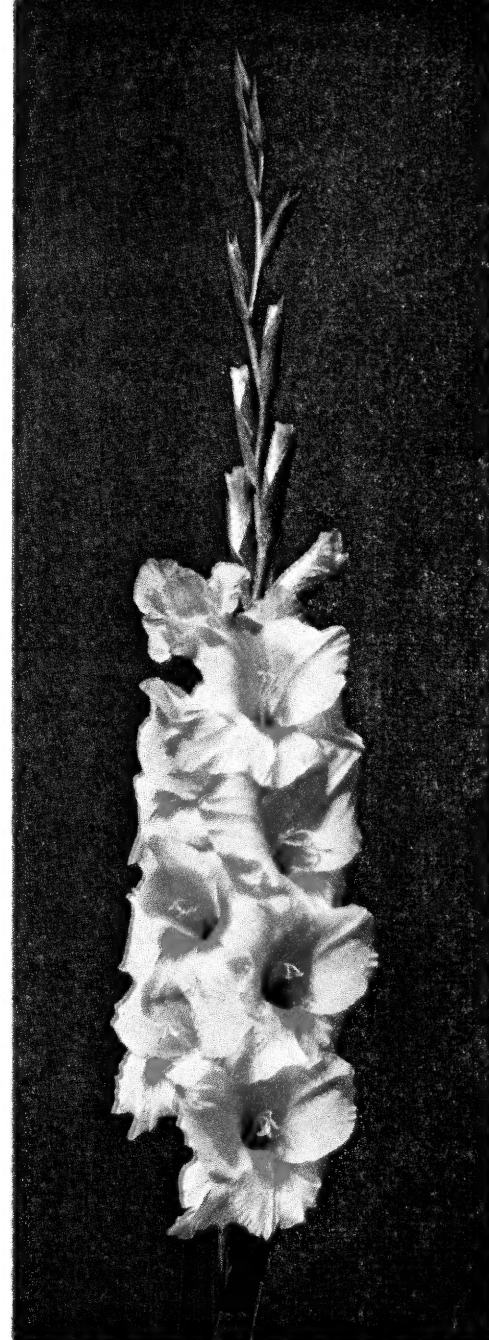

In our opinion, and in the opinion of many other growers who have seen it, this is one of the finest varieties; and in our 24 years of growing, this appears to be one of the very best we have ever seen.

OUR 1958 INTRODUCTIONS

JILL (Kroon '58) 460-75

There are few varieties that can equal the lovely color of Jill for decorative purposes and florist work.

The color is a very beautiful shade of rose pink with a soft cream throat that is unusually attractive. It has fine form—something like Spic & Span, which is one of its parents. The growth is strong and vigorous, producing spikes carrying 18-20 buds and opening 7 to 9 beautifully ruffled florets at one time, with 6 or more showing color.

Jill certainly is a study in color contrast with its soft cream throat enhanced by its rose pink outer portions which gives this variety a color combination that is very appealing. It has all of the characteristics to make it a grand glad and we are confident that it will attain a high position among the leading cutflowers before very long.

In naming this introduction, Jill, daughter of Mr. & Mrs. Gil Denison, we pay homage to this grand young lady (10 years old) who is as interested in glads as her dad, who not only thinks and talks 'glads' all day, dreams of them at night, but also grows them to as near perfection as it is possible.

NEW BEAUTIES FOR 1958

GIPSY ROSE (Seher '58) 562-80

For three successive seasons we have seen this superb gladiolus growing in the fields, and also displayed on the show tables. The first time Gipsy Rose was exhibited in 1951 at the Western Massachusetts Show, it created a sensation and was awarded first prize as best seedling. When shown again in 1953, it won longest flowerhead in the show with a flowerhead of 33 inches and when exhibited at the Connecticut Show in 1953, it won a Certificate of Merit which is rarely given in this state. In 1957, Gipsy Rose won the American Home Achievement Award at the Connecticut Show. It also has won Blue Ribbons in its color class six times.

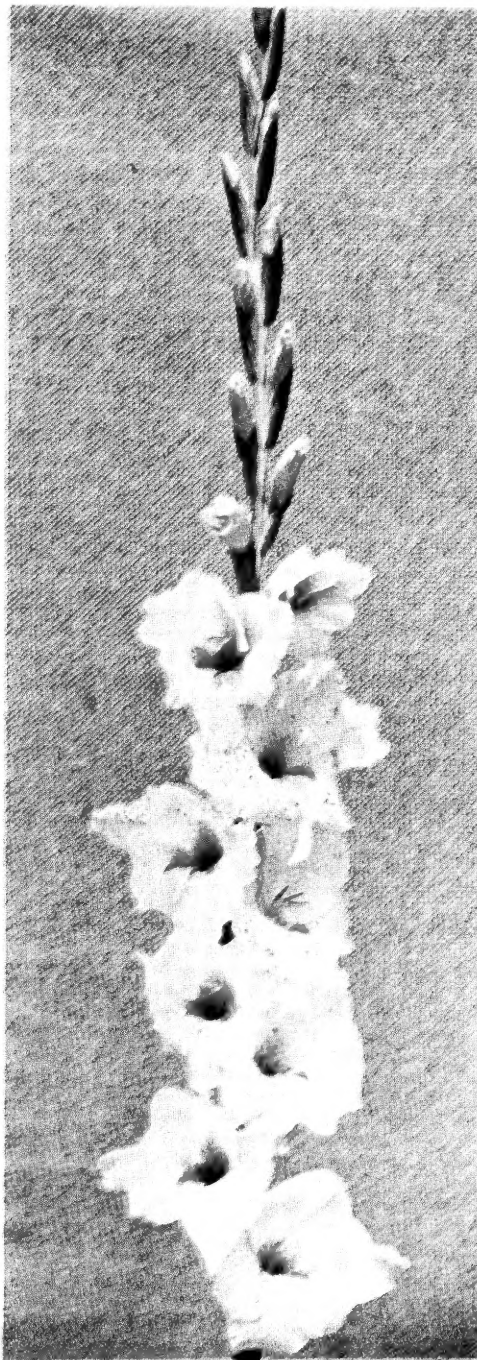

The individual florets consistently measure 6 inches in diameter with 6 to 8 well placed blooms open at one time, with 5 or more showing color. The 20-22 bud spikes are perfectly placed and have wonderful attachment. The plants are tall, make vigorous growth with deep green foliage and carry a flower spike 25 to 33 inches long. The blooms are of heavy substance. The color is medium rose with deeper rose shading in the throat. A fine exhibition variety as its record indicates and a splendid cutflower. A good stock permits us to offer this superb gladiolus at moderate prices.

NEW 1958 INTRODUCTIONS

DIMPLES

DIMPLES (Rohrbach '58) 340—85 days

We have grown most of the better known introductions of the past several years, and, although there have been many beautiful varieties among them, we know of none quite as beautiful, in our opinion, as Dimples. Not even our dreams have produced anything more beautiful!

While Dimples is not represented to you as a grand champion contender—true it will win "most beautiful," and is almost a sure bet for "most ruffled"—it does make a spike of respectable proportions. Flower heads run about 20" with good cutting stems and up to 7 of its 17 to 19 buds will open at once in perfect placement.

Florets are a beautiful pure pink with an alabaster throat. The texture is heavy and the ruffling precise. Healthy and a good producer of jumbo bulblets. One of our best customers last summer referred to Dimples as a "florist's dream."

In spite of a rather limited stock, Dimples is being priced so that you avid fans can try it in its introduction year without too much damage to the pocket book.

\$1.00 any size—No bulblets for sale this year.

SALMON CRINKLES (Rohrbach '58) 330—75 days

A sister seedling of Dimples (Wedgewood x Strawberry Peach) with about the same floret and spike characteristics. The color is a soft salmon and there are a few inconspicuous markings in the throat. Also healthy and a good bulblet producer. A worthy companion to Dimples and a variety we are sure you will like.

\$1.00 any size—No bulblets for sale this year.

CHOCOLATE CHIP (Fairchild '58) 290—75 days

A real dark brown glad in the style of Atom, even to the hairline silver edging. Has been extremely healthy, and a vigorous grower, producing plenty of easy germinating bulblets. Opens 6 or 7 florets, in typical miniature placement, on slender stems with a head length of about 19". We consider this a great improvement over Spunky, which has been a leader in its class. While stock is limited we are pricing Chocolate Chip low enough to enable everyone to try it.

Price \$1.00 any size. Blbts. 10/\$1.50

KING'S RANSOM (Rice '58) 410-90

One of the best prospects for cut flower growers—a variety that produces good spikes even in dry seasons. The flower stalks are not thick, but are strong and wiry, adding to the grace of this fine variety. The plants are tall and vigorous in growth with long flower spikes, often 28 to 30 inches with individual florets 4½ to 5 inches in diameter. Blooms are of good substance and perfectly placed and as many as 8 open on a 21 to 23 bud spike. Color is light yellow and florets are slightly ruffled. Was seedling Champion at the Binghamton Eastern International Show in 1954. And in 1956, Winston Roberts reported this variety was the best in his Trial Gardens.

\$1.00 each for any size, 5 for \$4.00, Bulblets 10 for \$1.50—100 for \$12.00

PARFAIT (Larus '58) 231 Early Mid Season (Peggy Ann x Figurine)

Here is a miniature which should win rapid acceptance as one of the best if not the best exhibition glads in the 200 division. The florets and spikes are definitely miniature type although it will produce a much more impressive show spike than most other small glads. The florets are wide open and gracefully formed but definitely do not go oversize, being 3¼" to 3½" on well grown spikes, which grow to a height of 50" to 58" tall with 18 to 23 buds and a 22" to 26" flower-head. The nicely ruffled florets are a clean medium salmon pink at the outside, shading lighter to a cream yellow throat with a small pale red blotch, opens 6 to 8 in perfect, well spaced placement. It is quite early and has not been shown often as a seedling but has won its class when given an opportunity and at the 1957 New Jersey State Show was best miniature seedling and miniature champion of the show. PARFAIT is a strong, vigorous flower from all sizes. If you are looking for blue ribbons at the shows or a miniature that will grow easily and consistently, try PARFAIT.

\$1.00 any size—Blbts. 10/\$1.50

DONDI (Kroon '58) 316 (Betty Duncan x Marionette)

Beautiful orange salmon-buff with rose blotching plus some yellow at base of blotch. It has a slender whip-like stem, having 18 buds with 7 to 8 well placed florets open at once. At the Pacific International Show at Grants Pass, Oregon, this attracted a great deal of attention and was awarded the American Home Achievement Award. Dondi is superb in the garden and exquisitely beautiful for arrangements. Good propagator and bulblets germinate easily and is a healthy variety.

Large size each \$1.00—Medium .75—Bulblets 12 for \$1.00

Unit Special: 1 Large, 1 Medium, 1 Small and 10 Bulblets Only \$3.00

TAMMY (Kroon '58) 240 (Wedgewood x Peter Pan)
A lovely medium pink shading to salmon with a light yellow blending in the throat. Florets are quite ruffled and are well placed on a spike of 16 buds with 6 open at a time. From large and medium bulbs spikes will have two well extended side shoots which makes it ideal for florist work and home arrangements. Should become very popular and will win more than its share of ribbons at the shows.

Large \$1.00—Medium .75—Bulblets 12 for \$1.00
Unit Special: 1 Large, 1 Medium, 1 Small and 10 Bulblets Only \$3.00

ROSALIE (Butt '58) 462 Midseason

In all its trial years as a seedling, this has always been an outstanding performer. It's been known as the "Rose Spic & Span" because it is a beautiful rose pink with a white throat and it makes tall, straight spikes which easily opens 8 florets. Its virtue is further attested by the Trail Grounds' judges who awarded it Silver and Gold Medals.

Its green, healthy plants attain a height of 60 inches with 28-30 inch flower heads and 18-20 buds. Rosalie has just everything a good glad needs to attain stardom—color—size uniformity—and is an easy cutter with virtually 100% top grade spikes, no short heads. For commercial or show purposes this is a winner.

\$1.00 any size—No bulblets for sale this year.

GLADIATOR (Butt '58) 336 Midseason (Peter Pan x Seedling)

Just out of this world for color and form. It's a flaming scarlet of a "different" color, closely resembling a carnation red. In form it's ruffled—really ruffled and needlepointed too!

Spikes are always straight, 50 inches in height, 18 to 20 buds, 6 to 7 open florets, well placed and attached. Gladiator is a real butterfly and lends itself to artistic arrangements. Submitted only once to the Trail Grounds, it earned a Silver Medal with a high score of 89. Truly, one of Nature's masterpieces.

\$1.00 any size—No bulblets for sale this year.

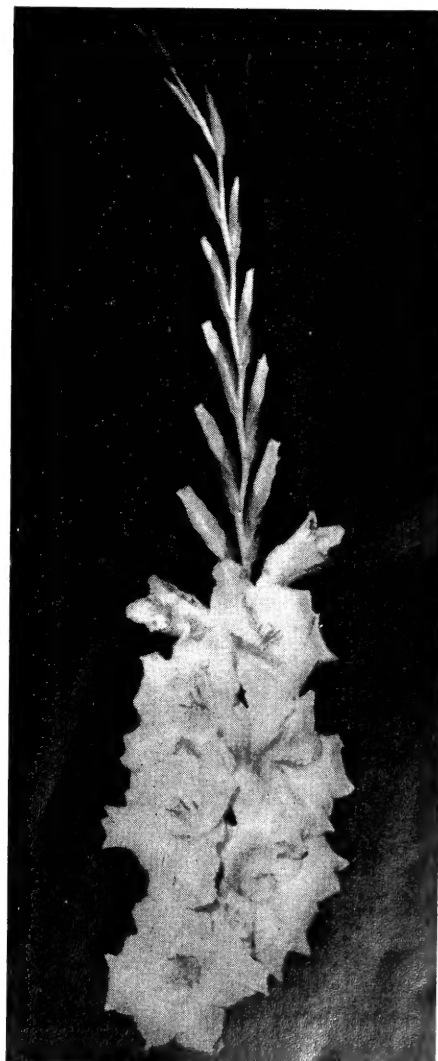

JETFIRE (Butt '58) 324 Early Midseason (Statuette x Seedling)

An unusual color combination—apricot red with a yellow throat on which is a fiery red thumb print. Modestly ruffled like its seed parent, it has also the same opening qualities—eight well placed florets at once and its spikes are straight, 38 to 40 inches in height with 15 to 17 buds. Excellent for arrangements and is an exhibition variety as well. Silver and Gold Medals from the Trail Grounds and an Award of Merit from the British Gladiolus Society, stamp this as a proven introduction. Jetfire is a bright, cheerful butterfly.

SPECTACULAR 1957

VIVA (Harris '57) 416-90

Parentage: Arctic Snow x Rangoon x Evangeline

A giant size, formal light buff or peach of enchanting beauty. The throat petals are a pure clean deep cream-white, outer petals are a clean buff or peach. A modified fluting adds to its appeal. Has five inch blooms. 22 to 24 buds with 8 to 10 blooms open and 6 to 8 buds in color. Florets are firmly attached and have wonderful substance. It has good facing and placement on a 60 inch straight, sturdy stem. The florets retain large size with but little taper in the flowerhead. Bulblet production and germination good. Great florescence, sheer beauty in form and color, and the acceptance either as a buff or peach make it an ideal florist glad as well as a show variety capable of winning anywhere. A very beautiful glad in a weak color class.

GINA (Harris '57) 560-85

Parentage: Arctic Snow x Rangoon x Evangeline

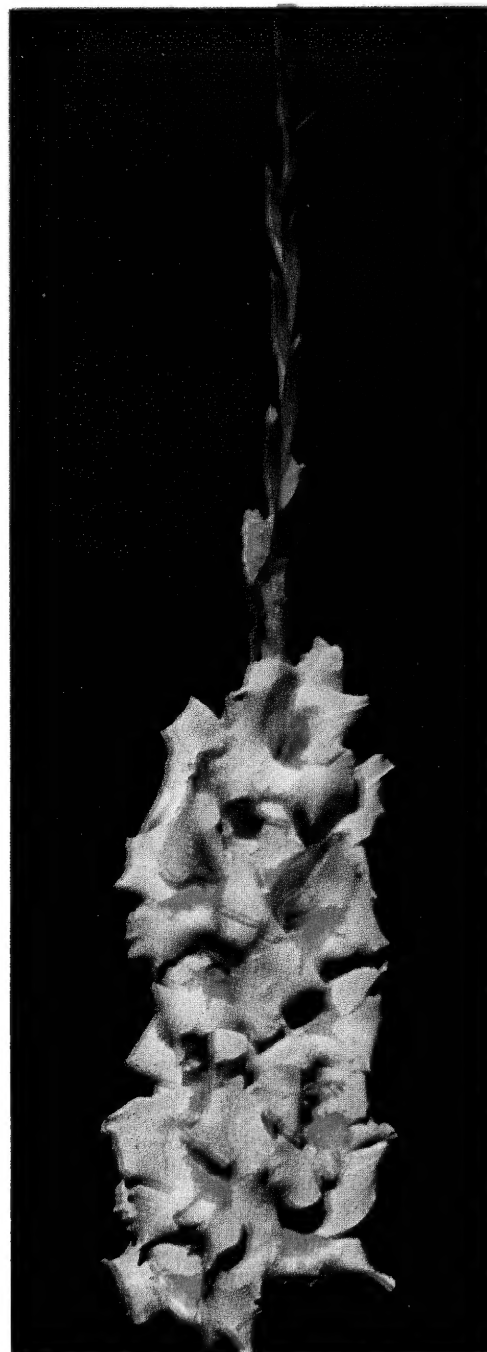

Glamorous Gina is what we called this glad thruout the 1956 season and it is just that. Stately and beautiful Gina will win your heart. The color is a soft, light rose-pink, its beauty is strikingly accentuated by its light golden yellow lower petals. Very tall and vigorous, with florets so large that it borders on the mammoth class. Habit perfect, including ideal placement and facing, and excellent substance. 8 to 10 florets open at once, each being 6 inches or larger, and wide open. But best of all, are the dimensions of its height and flower spike—for it is 5 to 5½ feet tall, with a long flowerhead, and always straight. Will become immensely popular as soon as there is a distribution of stock.

INTRODUCTIONS

This past year we had a larger planting of our 1957 introductions, which permitted more critical observation, and we are now more confirmed in our belief that this is one of the finest groups ever offered in a single year by any grower. We have had favorable reports from growers and show fans. Our fine stock permits us to offer these at much more attractive prices for 1958.

Gary sure is the finest yellow. I had 4 bulbs cut 5 perfect spikes, better than any yellow I have ever seen. As to Gina words can't describe the beauty this glad possesses. Certainly will want more of both. Thanks for the extras sure appreciate them.

—Gil Denison, Conn.

Gina is one of the most beautiful Gladiolus I have ever seen, also one of the best growers sure wish you could see the spikes 62 inches tall 7 open. This is superior to any other pink in my opinion.

—Leslie E. Grimsley, Virginia

Purchased your Harris' Special last season (Gina, Viva, Gary) and I certainly was pleased. Never have I received so much for my money. They are simply wonderful, and you can look forward to a repeat order in 1958.

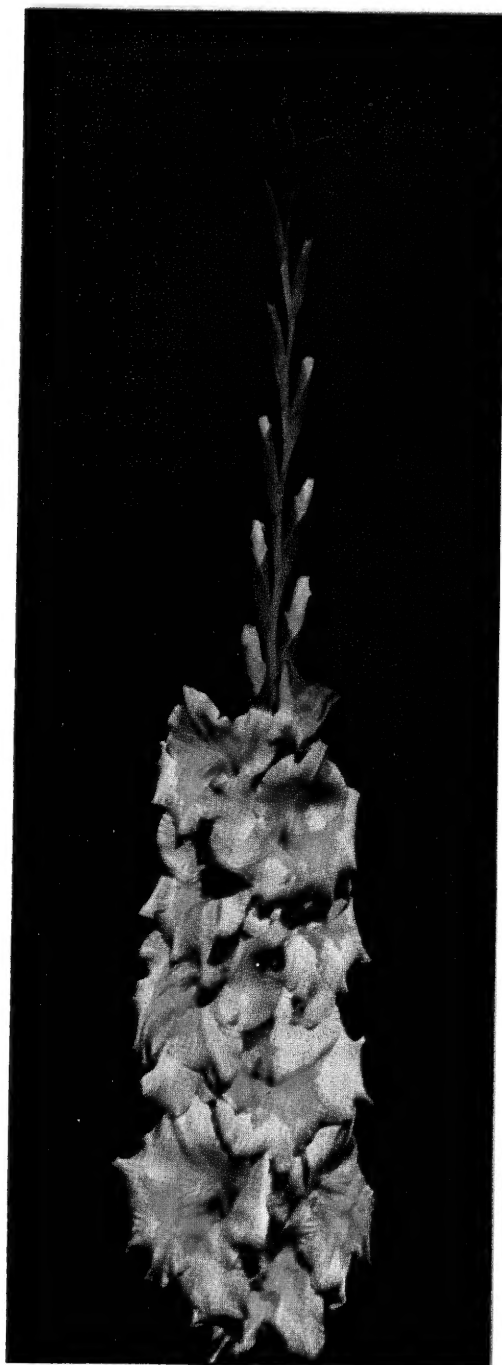

R. S. Gustavson, Conn.

Gary in my opinion rates very high, stood up very well in the heat and has long lasting keeping qualities. As to Gina and Viva you certainly were to modest in your description.

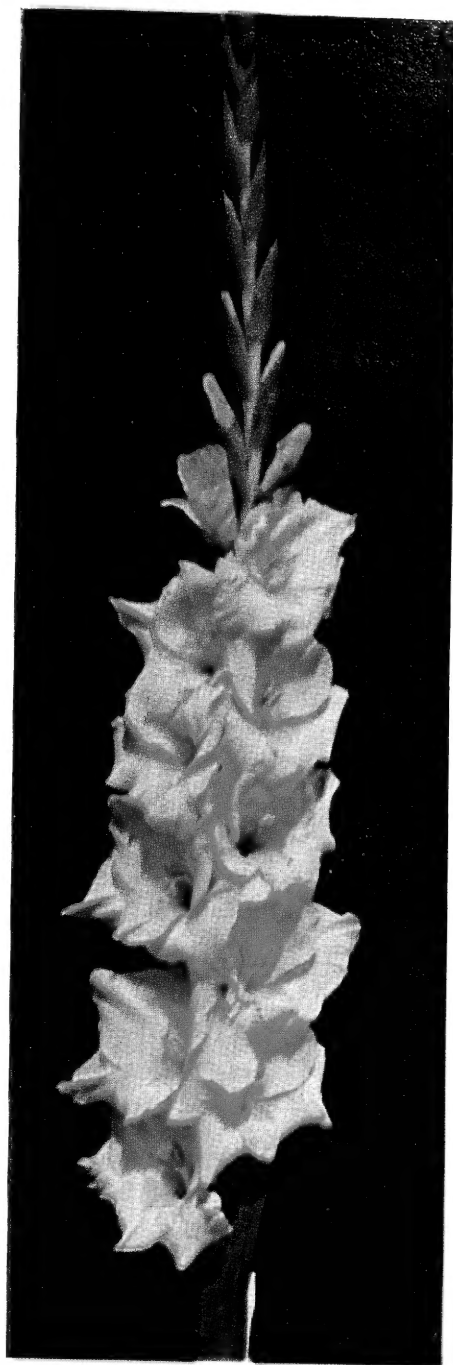

—William Robinson, New York

BOUDOIR

GARY

GARY (Harris '57) 410-75

Parentage: Yangtze x Golden Goddess x Orange Gold

The color of this beautiful seedling is a clean, light yellow with no other markings. Its substance is remarkable, opening 8-10 five inch florets on a 22-24 bud spike. I have had it stay in perfect condition 6 to 8 days in warm weather without coddling.

It is a rugged grower and in ordinary field culture it will easily reach 55 inches. The florets are always perfectly placed on a long straight flower spike. Its ruggedness of spike and exceptionally fine bulbs came from its parent Orange Gold and Yangtze. It produces bulblets lavishly and they germinate easily. Gary is a wonderful commercial, but may also have show aspiration as it has two Awards of Merit to its credit already, plus blue ribbons in its class.

ALL AMERICAN GLADS

EMPEROR (Carl Fischer, Ralph Baerman '58) 471-85

A true aristocrat, this glad of regal purple trimmed in ermine-white presents a stately display. Emperor makes majestic spikes growing five feet or more tall with 7-8 of its round, recurved florets open at one time. The plants are unusually robust and the spikes consistently tall and straight.

The rich, distinctive color of Emperor, its health and vigor, and ease of growing are characteristics which make it an ideal flower for the home garden. It has already distinguished itself on the show table as a seedling and it possesses the qualities of a champion. The outstanding color and fine qualities of Emperor resulted in an All-America Award for 1958.

CARIBBEAN (Ralph Baerman, Carl Fischer '57) 376-70

The delicate blue tones of this exciting novelty present an unusual combination of rare blue-violet petals handsomely embellished by a rich, deep violet throat and a small cream spear. CARIBBEAN opens from 9 to 11 precisely styled florets at one time in formal, double-row placement. It possesses a quality uncommon to many varieties and almost a rarity among "so-called blue glads", that of extreme vigor. In every way, CARIBBEAN displays to performance. It consistently produces tall, well-proportioned spikes and unusually healthy bulbs. It is the first distinctly ruffled blue-violet gladiolus. Every flower lover will want this striking novelty in his garden. Its refreshing beauty will make it a sure-fire winner in its class at flower shows.

Early last year I ordered a wide variety of bulbs from you, among them were some All American bulbs. They were all gorgeous but you may be interested to know that despite the severe drought here the All Americans came up beautifully. You are so right about Appleblossom—it does look like Corona. This is a really nice glad and, what's more, a healthy one at that.

Caribbean also surprised me. This is something that the originators can brag about. A beauty if there ever was one.
—Henry F. Diana, D.D.S.

MAYTIME (Ralph Baerman, Carl Fischer '57) 442-70

A light-hearted charm surrounds this brightly colored glad. The gracefully ruffled deep, pure pink florets with their contrastly large white throats bring back the memory of the freshness of May-blooming flowers. MAYTIME is a lithesome glad of good height. It readily opens 8 to 10 florets on spikes of five and one-half feet tall. A robust grower, MAYTIME has wonderful plant health and makes fine, plump bulbs. You will love MAYTIME for its long ribbon of color, for the silky taffeta sheen of its petals, and for its remarkable ease of growth. An ideal flower for either cutting or exhibition and a gem for the home garden.

ROYAL STEWART (Ralph Pommert '56) 450-75

A truly remarkable new gladiolus variety that has been widely acclaimed for its consistently fine performances under an extensive test program throughout the United States and Canada. The lightly ruffled florets are five inches in diameter and are of good substance. They are a clear light red and the long flowerheads frequently carry up to twelve flowers open at one time. Growth is vigorous and healthy, with the total height of the plants running about five feet. On the occasions when it has been exhibited at gladiolus shows, ROYAL STEWART has proved to be an outstanding winner of top awards.

APPLEBLOSSOM (Ralph Baerman, Carl Fischer '56) 460-65

A gladiolus of the utmost delicacy of coloring, the predominating hue being snowy white with a faint touch of cream in the throat and an exquisite flush or corona of cool rose pink at the edges of the petals. Up to eight or ten trimly tailored florets, about five inches in diameter and of very heavy substance, are open at a time on spikes up to five feet tall. A vigorous, easy grower that performs excellently with only average culture. APPLEBLOSSOM will give you a new conception of gladiolus beauty when it blooms in your garden.

PLEASE READ CAREFULLY BEFORE ORDERING

MAKING OUT YOUR ORDER. Please put everything down on the order blank just as listed in the catalog. After adding it up, figure your bulb discount and add on the extra bulbs of your choosing.

DISCOUNTS AND EXTRAS. On all cash orders from the **RETAIL** descriptive list of \$3.00 to \$10.00 you may select 10% extra in bulbs of your own choosing. From \$10.00 to \$20.00 you may select 15%, all over \$20.00 select 20%. Discounts do not apply to Collections, Special Offers, Wholesale Order or 1958 Introductions from Birchville Gardens or from other growers or originators.

MINIMUM ORDER. Due to the continued rise in general, we will be unable to accept orders for less than \$3.00. No orders will be accepted for less than the smallest unit listed in the retail list for each variety, except that when the smallest unit is ten, five bulbs will be sold at one-half the ten rate. Where bulbs are priced singly, ten bulbs will be sold for the price of eight.

SHIPMENT. Unless otherwise requested retail orders will be sent out between March 1 and April 1 or sooner, if weather permits. Wholesale orders will be shipped as soon as possible after receiving them. All retail orders will be sent prepaid to all points in the United States.

F.O.B. ITEMS. If your order contains both f.o.b. and retail items, we will ship them together in one package f.o.b. but will give enough overcount and extras to more than offset the carrying charges on the retail items.

SUBSTITUTIONS. We will not substitute varieties or size unless your order specifically instructs us to do so. It is advisable to specify a second choice of variety or size, particularly if your order is placed late in the season.

CANADIAN CUSTOMERS. All Canadian orders must be accompanied by import permit. Apply Division of Plant Protection, Science Service, Ottawa, Canada for permit and mailing label, for bulbs and bulblets.

SIZE OF BULBS. L indicates large size bulbs measuring more than 1 1/4 inch in diameter. M is a medium size bulb, 3/4 to 1 1/4 inch in diameter. S indicates a small bulb, under 3/4 inches in diameter. Blbts. stands for bulblets.

You will get best results from the large bulbs. They will produce the best show spikes. Medium size bulbs will often produce show quality spikes, and will produce good saleable spikes. Small bulbs will in most cases bloom. The spike they produce is not top quality, but you will get a large bulb to grow on next year; they also produce quite a few bulblets.

GUARANTY. We make every effort to keep our stock true to name and free from disease and insects. Please open the package immediately upon receipt, examine carefully, and if not satisfactory, advise us at once. All of us make errors once in a while and if any of the bulbs are found to be not as represented, we will either refund your money on their return, or we will replace the unsatisfactory stock. However we can at no time be liable for more than the original amount paid for the bulbs. All orders are placed with this understanding. All stock has been state inspected.

THE LEGEND OF THE FLOWER OF PEACE

The old Zulu chief lay dying, and by him stood his two stalwart sons, half brothers, and dearly beloved of each other.

They had played and hunted together as children and, in manhood, had fought side by side.

Soon, when the spirit of the old chieftain had passed to the Great Beyond, tribal custom decreed that one of the sons would be proclaimed chief of the tribe, but, only after a test of strength and skill in combat with the ceremonial fighting spears, would the right man be chosen.

The old man loved his sons and feared for their happiness. He did not wish their blood to be spilled in deadly combat. Reaching for those ceremonial spears that were to be used in the mortal conflict, and with a mighty effort, he stood erect before his young men.

Leaning on those spears, deep driven into the ground, he blessed his sons, and from them demanded a solemn promise not to war with each other, but to jointly rule his people in peace.

The old chief died, and the spears were left to mark his grave. The tribe moved to a new location.

Years later a party of warriors passing by the old village site beheld two beautiful flowers growing from where the spears had pierced the ground.

They bore the flowers to their chieftains, who, when they had listened to the story, vividly remembered their promises to their father.

Before the whole tribe assembled, the two sons renewed their vows of peace, and, kneeling in front of the flowers—one red, the other pure white—emblems of love and honour—named the flowers "Gladiolus"—Flower of Peace.

General List of Recent Introductions

All our bulbs are plump and healthy, and both large and medium bulbs are of blooming size. Small bulbs usually produce blooms late in the season. Bulblets seldom bloom the first year and a small percentage always fail to germinate—the rest grow mostly into medium and small bulbs.

Large bulbs always produce the finest exhibition spikes and sometimes throw several spikes from the bulb. Medium sized bulbs give excellent spikes particularly when planted early in the season. Small sized bulbs can produce good spikes but as a rule seldom give much more than medium sized spikes, but produce large bulbs for the following season.

Large bulbs are 1¼ inches in diameter or over; medium are 1 inch to 1¼ inches; and small bulbs are ½ to ¾ inch. L. = large, M. = medium, S. = small, blbts. = bulblets.

(L 1-.30; 10-2.40) (M 1-.20; 10-1.60)
(S 2-.20; 10-.80) (Bibts. 10-.25; 100-2.00)

GENOVEVA (K&M '55) 406-80

A seedling of Adorable, with creamy-white, greenish throat. A wonderful producer of tall spikes with up to 10 open florets which are perfectly placed. Opens splendidly when cut in bud which will make it a favorite commercial. As a show variety it can beat easily anything in its class.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Bibts. 25-.25; 100-.75)

GOLDEN BOY (Secrest '54) 312-80

A very nice deep yellow that opens 8 wide open 4 inch blooms on a spike of 20 buds. Should be the best yellow for exhibiting in the medium size class.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Bibts. 15-.25; 100-1.00)

GOLDEN PALOMINO (Summerville '56) 417-80

Palomino is that rare glad that combines beauty with outstanding performance. Large and medium bulbs uniformly produce 56" spikes with 28" to 30" flowerheads and ample cutting stems. Six to nine 5" florets will open with two-thirds of the remaining 22 or more buds in color. Bulb health is excellent and while propagation is only average, the bulblets produced germinate pretty nearly 100% with no special treatment whatsoever. Florets are a soft apricot buff with a small orange spot in the throat and are lightly ruffled with raised midribs—texture is good.

(L 1-.75; 10-6.00) (M 1-.50; 10-4.00)
(S 1-.25; 10-2.00) (Bibts. 5-.25; 100-4.00)

GOOD MORNING (Lacey '54) 561-85

An enormous Corona type but whiter and in addition has a soft rose throat. This one is an easy grower from all sizes producing long 21 bud heads with 7 open. A terrific propagator and a very healthy variety. Should be a leading commercial. See color picture on page 5.

(L 2-.35; 10-1.40) (M 2-.25; 10-1.00)
(S 3-.25; 10-.60) (Bibts. 40-.25; 100-.50)

GRAND NATIONAL (Salman '45) 544-80

A giant glad with 8-10 open florets on tall erect stems. Color is a vivid reddish pink with a slight white mark in throat.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80; (Bibts. 15-.25; 100-1.00)

GREEN WOODPECKER (K&M '57) 405-75

This irresistible unique new color is most delightful and has no equal. Color is a deep lemon-green with two wine-red markings on the deeper green lower petals. The tall upright straight stem carries from ten to twelve medium sized florets, wide open and perfectly spaced and placed. A variety that will be a favorite with artistic florists and cut-flower growers. A real top notch show glad and one that will go places.

(L 1-4.00) (M 1-3.00)
(S 1-2.50) (Bibts. 1-.40; 10-3.00; 100-24.00)

GREGOR MENDEL (Preyde '57) 536-80

A scarlet red with 6 to 8 perfectly shaped large florets on an 18 bud spike. This, in my opinion, is one of the most promising glads both for exhibition and cut-flower. Good grower and propagator.

(L 1-.25; 10-2.00) (M 2-.25; 10-1.00)
(S 2-.25; 10-.80) (Bibts. 25-.25; 100-.75)

JIM'S DELIGHT (Milo '55) 452-80

A beautiful sanguine red, similar to Red Charm. The real beauty of this flower lies in its iridescent quality. The depth of the red changes as you look at it from different angles. Surprisingly enough, you can even see a bronze effect at certain angles. We honestly believe that Jim's Delight will become one of the greatest reds of all time. It is a wonderful grower. It makes spikes up to 60 inches. Opens 6-8 on a 20 bud spike. Florets are firmly attached and well-placed. Propagation is very good.

(L 1-.40; 10-3.20) (M 1-.30; 10-2.40)
(S 1-.20; 10-1.60) (Bibts. 10-.25; 100-2.00)

KAREN (Mazur '52) 471-85

One of the most striking novelties seen in some time. A rather dark rose-purple with a strikingly contrasting cream blotch. Florets are somewhat waved and well rounded with 8-10 open at a time. One you will surely like.

(L 1-.20; 10-1.60) (M 2-.25; 10-1.00)

KEUKENHOF (Visser '55) 562-90

Clean orchid lavender-rose blending deeper at edge, with white mid-rib, cream throat. Grows up to 58 inches with ten open on a 21 bud spike. Should become a heavy winner at the shows with its huge spikes.

(L 1-.25; 10-2.00) (M 1-.20; 10-1.60)
(S 2-.30; 10-1.20) (Bibts. 10-.20; 100-1.50)

LAVENDER GLORY (Spiller '53) 467-80

Tall growing lavender with deep rose blotch and splashings of same color on petal edges. Will open 8 with as many more showing color, and 6-8 green buds. Broad upright foliage. Florets ruffled, fluted and recurved, lying flat against the stem in perfect formation. Extra tall grower with graceful, willowy stems. Good bulblet maker and producer of exceptionally healthy bulbs. A sure fire commercial.

(L 1-.35; 10-2.80) (M 1-.35; 10-2.00)
(S 2-.30; 10-1.20) (Bibts. 10-.25; 100-2.00)

LIBERTY (Larus '56) 432-90

The 5¼ to 5½ inch florets are a deep orange salmon self with 10 open in tight attachment and perfect placement. The flowerheads are up to 30 inches and the spikes are all straight and grow up to 60 inches. Certainly one of the best bets for a grand champion.

(L 1-.50; 10-4.00) (M 1-.35; 10-2.80)
(S 1-.25; 10-2.00) (Bibts. 5-.25; 10-.40)

LILAC TIME (Howell '55) 466-70

Lilac Time is an extra early lavender, having great commercial possibilities. Always straight and tall. With 26-28 inch flowerhead and 6-8 florets open. Certainly one of the best 1955 introductions.

(L 1-.40; 10-3.20) (M 1-.30; 10-2.40)
(S 1-.20; 10-1.60) (Bibts. 10-.25; 100-2.00)

LILAC PERFECTION

There is hardly another gladiolus with this odd lilac-blue coloring. Certainly an unusual variety that grows up to 50 inches tall with 6-8 perfectly placed florets open at a time. For something unusual in color try this.

(L 1-.35; 10-2.80) (M 1-.25; 10-2.00)
(S 2-.30; 10-1.20) (Bibts. 10-.25; 100-2.00)

LOIS ANN (Kidney '57) 440-70

One of the largest of the early pinks. Lois Ann opens 6-7 round 5 inch florets on long flowerheads of 18-20 buds with spikes up to 55 inches tall. One for the early cut-flower growers.

(L 1-.35; 10-2.80) (M 1-.25; 10-2.00)
(S 2-.30; 10 1.20) (Bibts. 10-.25; 100-2.00)

LORELEI (Howell '55) 406-92

Tall ivory cream shading to deep cream or pale yellow in the throat. Has been grown 6 feet tall with 20 bud spikes measuring up to 37 inches—8 to 10 open, with 7 average and 8 more in color. Spikes are always straight. Field grown stock will average 18 buds with 6 to 7 open, all buds opening to the tip in water. A very rapid propagator. Every bulblet germinates and with early planting and good culture will bloom and make large bulbs.

(L 1-.35; 10-2.80) (M 1-.25; 10-2.00)
(S 2-.30; 10-1.20) (Bibts. 15-.25; 100-1.00)

LORI DEE (Harris '54) 460-85

Beautiful ruffled heavily textured light rose with slightly deeper rose throat. A wonderful cutter with 20 buds and up to 10 open on a 60 inch spike. It is a pleasure to grow Lori Dee.

Like the Giant in history, this huge cream with cerise throat markings has excellent texture; grows 66 to 76 inches tall with 21 buds showing and 10 opening easily. Has been scored up to 92 in seedling shows. A real giant glad with class.

(L 1-1.50; 10-12.00) (M 1-1.00; 10-8.00)

PARTY RUFFLES (Rich '57) 406-80

A beautiful dream of very heavily ruffled cream, with a suspicion of pink showing thru the petals, like a pink slip showing a hint of color under a girl's ruffled, frothy, party dress. It will open 8-9 of its large lovely florets at a time on fine sturdy spikes. A great prospect for show and commercial. It already has an outstanding show record.

ROSANNAH (Kydd '53) 563-90

Medium deep rose with rose lines in throat. Grows very tall and opens 9-10 on a very long head. An unusual and very beautiful color. Has won wherever shown. Wonderful commercial and exhibition variety. One of the best 1953 introductions.

(L 1-.20; 10-1.60) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Blbts. 25-.25; 100-.75)

ROSY VEIL (Magnuson '55) 463-85

From a new hybridizer comes this wonderful commercial and exhibition glad. The color is a medium rose with an attractive red throat that is not too conspicuous. Opens 8 florets with 7 or more showing color on a 20-22 bud spike. Florets are ruffled with very good substance and attachment and are perfectly placed. It is a wonderful grower of good cutting spikes. From what we have seen of Rosy Veil it is a rosy Spic & Span, but I sincerely believe this is a better grower. Here is a glad with every good quality you could demand of a glad either commercial or exhibition—color, texture, form, health and excellent propagation. A wonderful cut-flower prospect.

SALMON QUEEN (Schrenck '55) 532-80

Tall striking salmon with creamy throat. Opens up to 11 on a 32 inch flowerhead. This is a new outstanding glad and I predict a tremendous future for it.

(L 1-.75; 10-6.00) (M 1-.50; 10-4.00)
(S 1-.25; 10-2.00) (Blbts. 10-.50; 100-4.00)

SHAMROCK (Howell '57) 536-70

A light yellow, tinted light green with green buds. As many as 10 florets open and has a flowerhead of about 30 inches with 20-21 buds. This has the cleanest color, is the healthiest and one of the best green glads. Women love it for arrangements. Good commercial prospect as it is very early.

(L 1-1.00; 10-8.00) (M 1-.75; 10-6.00;

SAN ANTONIO (Majewski '55) 552-85

Rich red sport of Burma, lacking rose coloring of parent, otherwise a duplicate in most other respects. Opens 8-10 heavily ruffled 5 inch florets on a 50-55 inch spike. Will be excellent for an early red as it opens much better than Burma.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Blbts. 40-.25; 100-.50)

SCARLET LEADER (Salman '54) 452

A superb Holland introduction which is actually red in color. Opens 10 well placed florets on formal spikes. A very rugged grower that should become an outstanding commercial and show variety.

(S 1-.20; 10-1.60) (Blbts. 10-.25; 100-2.00)

SCEPTRE (D. W. White '54) 410-85

Clear, soft, light yellow that opens 8-9 wide lightly ruffled florets on tall stems, long heads. One of the best exhibition yellow.

A ruffled deep red of heavy substance and smooth velvety sheen. A shade darker and about 10 days earlier than Red Charm. Opens 6 on a 20 bud stem, stiff and straight. An extremely vigorous and healthy grower. It will throw spikes 55 to 60 inches tall with flowerheads of 27-30 inches long. It opens 6-8 from a total of 18-20 buds. The 5½ inch florets, which are a light blush pink shading to a cream throat with a large light red blotch, are quite unusual and striking.

GREEN ICE (Barker '57) 304 (E).

The greenest glad yet originated; a real novelty. Deep greenish cream with no markings. Many medium-sized florets open on tall, strong spikes.

(L 1.25; M .75; S .50)

(Bibts. 10-.50; 100-3.50)

VANISLE (White '52) 590

This is a unique and beautiful smoky unlike anything else. It has created a sensation the past two years. To me the color is sort of mulberry with a few darker lines on a small cream lip. Blooms often 7" or over, ruffled, needle-point, wide-open and flaring. One of the very best smokies and much more beautiful than most of them. Has a charm all its own. The limited amount of stock limits its popularity.

(L 1-.75; 10-6.00) (M 1-.50; 10-4.00)
(S 1-.25; 10-2.00) (Bibts. 10-.50; 100-4.00)

VENUS (Salman '55) 367-80

An exquisite light blue with a dark violet-blue blotch. Opens 10 well-placed florets with 6 more showing color on a 22 bud spike. One of the most distinctive novelties that should become a good show glad and cutflower.

(L 1-.60; 10-4.80) (M 1-.40; 10-3.20)
(S 1-.30; 10-2.40) (Bibts. 8-.25; 100-2.50)

VINK'S GLORY

Very highly rated new yellow of splendid quality. Opens 8 large florets on a well balanced spike of 18-20 buds. Color somewhat like Gold. Should be a good exhibition variety as well as an outstanding commercial.

(L 1-.50; 10-4.00) (M 1-.35; 10-2.80)
(S 1-.25; 10-2.00) (Bibts. 10-.40; 100-3.00)

BIRCHVILLE GARDENS — PLAINVILLE, CONNECTICUT

WASHINGTON (Salman '53) 542-80

An enormous new apple blossom pink from Holland. Produces very impressive exhibition blooms with up to 12 open on very strong and tall stems. One of the finest varieties in our 1955 trial garden.

(S 2-.20; 10-.80) (Bibts. 15-.25; 100-1.00)

WAX CANARY (Woods '54) 530-80

This is a beautiful salmon blending to a deeper salmon near the edge, with yellow toward the center. Florets are charmingly frilled and ruffled. Opens 7-8 on a 20-22 bud spike. Grows up to 60 inches tall and has won championship awards.

(L 1-.30; 10-2.40) (M 1-.20; 10-1.60)
(S 2-.20; 10-.80) (Bibts. 15-.25; 100-1.00)

WHITE EXCELSIOR (Europe '54) 500-70

One of the best for early cut flowers. Grows up to 60 inches tall with 6-8 perfectly placed open florets. Certainly recommend you try this. We have had fine reports from growers. Most of them agree that this is one of the best large early whites.

(L 2-.35; 10-1.40) (M 2-.25; 10-2.00)
(S 3-.25; 10-.60) (Bibts. 40-.25; 100-.50)

WHISTLE STOP (Woods '53) 462-80

Brilliant rose-purple that grows up to 66 inches tall with

a 34 inch flowerhead and 10-12 open. The ruffled florets are firmly attached. In the rose class it would be hard for anything to beat this.

(L 1-.35; 10-2.80) (M 1-.25; 10-2.00)
(S 2-.30; 10-1.20) (Bibts. 10-.25; 100-2.00)

WILD ROSE (Fischer '55) 460-80

Sparkling clear rose with a blended white throat. Opens 7-8 florets of heavy substance on tall, graceful spikes. The 5 inch florets are well placed on a 20 bud spike. One of Carl Fischer's better varieties that should become a leading commercial.

(S 2-.20; 10-.80) (Bibts. 25-.25; 100-.75)

TEMPTRESS (Fairchild '57) 440-80 days

A 1957 introduction that has already won 4 Grand Championships—also reserve champ at the big Cleveland show last summer. Opens 9 to 11 formally placed 5 inch florets with 8 showing color. Spikes with over 30" heads and 25 buds are common from large and medium bulbs. The light pink florets have some deeper spur lines in the throat and are wide open and nicely ruffled.

(L 1-1.00; 10-8.00) (M 1-1.00; 10-8.00)

Miniatures and Small Varieties

In 1957 there was a decided increase in the interest shown in miniatures. There are probably several reasons for this, but we think the most important is that miniatures are the perfect home arrangement flower. More florists and home arrangers have come to see the value of this type for small arrangements. They are unsurpassed in making up table decorations, their grace and delicacy, as well as small size, makes them the perfect flower for bridal bouquets, cascades, corsages, mantle pieces, and other dainty arrangements where larger varieties would be out of place.

ATOM (Hedgecock '46) 236-70

A beautiful small flowered scarlet with a gold edge around each petal. A great show winner and one that is good for all uses. Florists love this one.

(S 2-.20; 10-.80) (Blbts. Pkg. .25)

BETTY CO-ED (Briggs '45) 240-75

A soft creamy pink that is a heavy show winner. Fine as a cut flower and is a good, healthy propagator.

(S 5-.30; 10-.80) (Blbts. Pkg. .25)

Queen of the small glads! It is buff pink with a yellowish throat faintly dusted with red. Very early, deeply ruffled, and heavy substance. Grows up to 50" with a 17-18" flowerhead carrying 16 to 18 buds with 6 open. YOU WILL LOVE BO-PEEP.

(L 2-.30; 10-1.20) (M 3-.25; 10-.80)
(S 5-.30; 10-.50) (Blbts. Pkg. .25)

CLAUCARCY (Maynard '52) 241-87

Nice shade of light pink with cream throat and white mid-ribs. Up to 20 buds with 6-7 open and 6 in color. This won consistently high ratings at 4 trial gardens in 1951.

(S 5-.30; 10-.50) (Blbts. Pkg. .25)

CRINKLETTE (Butt '41) 224-70

GREEN THUMB (Butt '56) 212-70

Buds are so beautiful, like rosebuds, and really green. Fully open, deep greenish yellow, deeper in the throat, a solid unmarked color without blemish. LITTLE SWEETHEART (Fischer '48) 240-85

Little Sweetheart is a "love at first sight" type of glad — it has that romantic type of beauty that one dreams about but rarely sees. Its waxy snowy-white throat, pink school-girl complexion and excellence of form, place it at the top of its class.

(L 2-.30; 10-1.20) (M 2-.30; 10-1.00)

Standard One Price Varieties

The following popular varieties contain the best of the proven exhibition and commercial types and are being grouped at one standard price, to enable our customers to select these varieties without looking up prices separately. Cost is no criterion of the charm and beauty of a *Gladiolus*. In most cases prices are not reduced to this low level until the variety has proven its worth. We don't offer a variety solely because it is new and the price is high; neither do we drop one from our list because it reaches a low-price field. What we do offer is potential beauty, in bulbs of such health and vigor, that you may confidently expect to realize in your garden the possibilities that have already made you a Glad Fan.

Large Bulbs 2 for .30; 10 for \$1.20; 25 for \$2.40
Medium Bulbs 3 for .25; 10 for .80; 25 for \$1.60

The 10 for \$1.20; and 25 for \$2.40 prices are applicable to one individual variety, not to different ones priced alike.
 No order accepted for less than 2 large, 3 medium, or 5 small bulbs of any variety.

A. B. COUTTS (Coutts '53) 516-85

A very vigorous giant apricot buff blending to deep yellow in the throat. It will consistently throw heads well in excess of 30 inches. Spikes are tall and straight carrying 22 to 24 buds, opening 8 with 8 or more in color. The 6½ inch florets are well placed and attached. Propagation is excellent and makes clean bulbs.

ACE OF SPADES (Sisson '50) 454-85

One of the darkest of the black reds. Clear glistening deep black with silky sheen and buds of jet black. Opens 4 or 5 large very nicely waved and ruffled florets on tall spikes. Very popular with those who like the dark ones.

ADORABLE (K&M '54) 406-80

An utterly charming sulphur cream shading to an amber with a creamy throat blotch. Buds are slightly ruffled and buds are greenish. These greenish buds and deep cream blooms produce a very beautiful color effect. It opens eight on a very tall stem. Good placement and attachment of its 20 buds. This is the best real cream variety we have seen.

ALFRED NOBEL (Salman '54) 445-90

A deep pink with a large cream blotch. Very healthy and a strong grower of splendid exhibition spikes. Opens 6-8 five inch florets on a 20 bud spike. Looks like a coming commercial.

AMERICAN BEAUTY (Barrett '48) 464-80

ANDRENA (Armstrong '50) 460-85

This is certainly one of our most beautiful glads. A lovely light orchid with a large creamy white center. It opens 7 or 8 ruffled florets of good size on sturdy straight spikes. Propagation and germination are very good.

ARC DE TRIOMPHE (Europe '52) 410-95

A light yellow with a deeper yellow throat. Opens 8-10 perfectly placed florets that are well-attached. This should become one of the very best for commercial use and can also win its share of ribbons.

ARISTOCRAT (Salmon '50) 464-85

Here is a sure winner in its class. A huge purplish wine-red that opens 6-8 on very tall spikes. This is the tallest glad we have. Has leathery textured florets. A must for all show fans. Very healthy bulb producer.

ARIADNE (Mitsh '37) 401-86

A creamy-white with a striking red blotch. This is one of the oldest glads in our catalog and it is a real beauty.

ATATURK (Salman '51) 354-75

A very deep black-red with velvety glow—almost black in full sunlight. It is certainly one of the best in this color. It grows tall with 6 open florets. Visitors to our gardens like this one.

BETTY DUNCAN (Benedict '49) 422-85

A clear orange with golden throat. Tall, willowy stem with 6-8 open on a nice head. Certainly one of the best orange glads.

BOISE BELLE (Roberts '48) 433-98

A unique novelty and show glad that is distinctly different. One of my favorites. Opens up to 10 very heavily ruffled florets that have a leathery texture. Medium pink at the edges blending to a light yellow throat. A champion at shows and a wonderful cut-flower.

BOLDFACE (Evans '47) 533-82

Striking deep salmon-pink with black-red brush mark on clean white throat. Opens 8 five-inch blooms on a tall spike. Has a fine show record and looks like the best variety from Evans.

BUFF BEAUTY (De-Be) 416-70

An early blooming pure self buff. Opens 6-8 quite attractive formal blooms on good spikes. Should make a good early cut-flower.

BURMA (Palmer '43) 564-88

A very deep rose-red with 6 wide open blooms that are very heavily ruffled. This past season it won at most of the large shows. In my opinion it is getting better each season.

CATRIONA (Taylor '53) 406-75

Large slightly ruffled deep cream. Opens 8 on a tall straight spike—20 or more buds on a long head. Silver Medal and Award of Merit in C.G.S. Trials. Should become a fine commercial.

COLUMBIA (Roberts '51) 407-86

Very near the color of Corona except the halo is more uniform. Opens 8 firmly attached and well-placed florets on a 24 to 26 inch flowerhead. This one is going places as a show variety and will become one of the finest commercials. We congratulate Winston Roberts for this introduction.

CONNIE G. (Woods '48) 506-75

A very outstanding new cream with heavily ruffled 6 inch florets. Opens 8 to 10 on a 20 to 22 bud spike that grows 55 to 60 inches tall. You will be thrilled when you grow Connie G. It is the most beautiful cream you have ever seen.

CONTRAST (Arenius '54) 417-80

A distinctive and appealing novelty that instantly attracts attention whenever seen. Clear buff color offset by a prominent rose purple throat. It will open 7-9 four inch blooms on a 24 bud flowerhead. About 52 inches overall. Good easy grower from all size bulbs.

CRATER LAKE (Williams '54) 478-80

The largest violet-blue we have seen, with slight cream feather in the throat. The plant grows tall and straight; flowerheads carry 20 buds, opening 8 wide open, 5-inch florets with 6 showing color. It is very healthy and a heavy propagator. Should be tops for a commercial and is a fine show glad.

DARK DAVID (Morgan '51) 554-90

Dark David is far ahead of any other maroon gladiolus that I know. One of the few meritorious 500 size glads in its color class at the present time. Dark David will open eight 5½" florets at once. A wonderful grower that approaches five feet and a consistent producer of show spikes. Splendid propagator.

DIEPPE (Hassel '45) 436-85

Deep salmon-red with a darker blotch. A very beautiful and distinctive color. Opens 7 to 9 large well-arranged blooms on a good spike. A very popular glad.

DUSTY MILLER (A. C. Elliott '45) 486-85

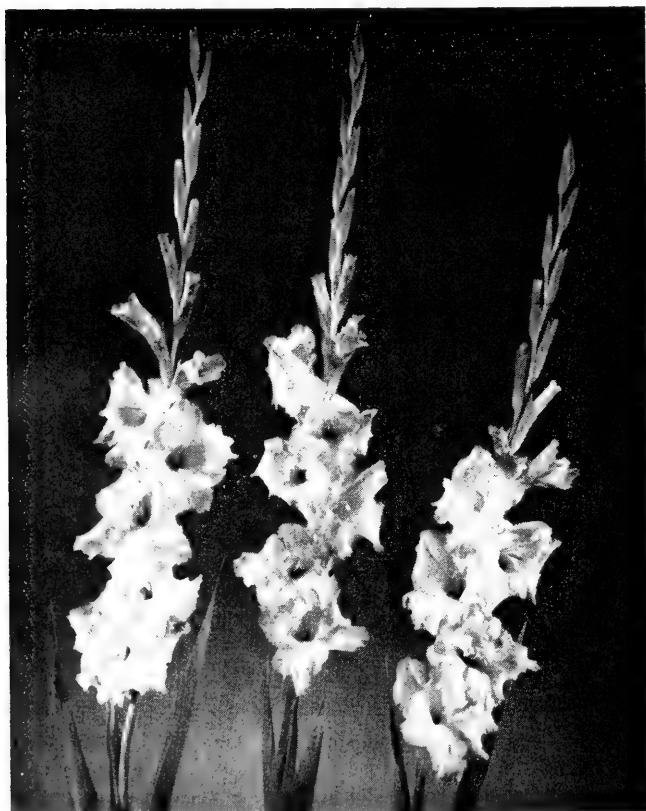

One of the very best new smokies. The color is old-rose with a light red blotch. A good grower. I recommend Dusty Miller because I am sure you will like it.

EARLY RED (Knight '53) 450-68

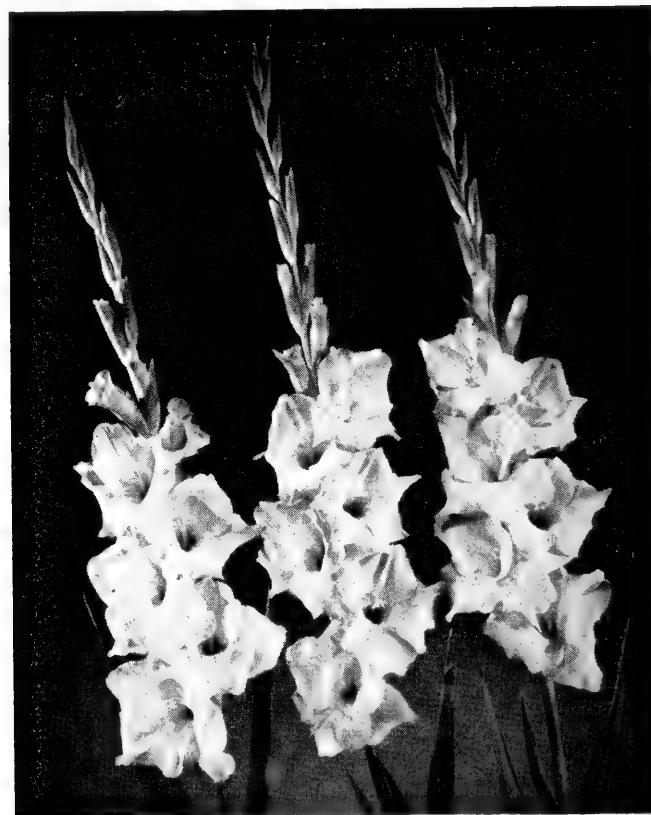

We are sold on the value of this fine, early, pure glowing red. Plants range 50-60 inches tall. Opens 6-7 large florets on a 26-29 inch flowerhead, with 21 buds. Probably its greatest value is as an early commercial. Has a lovely clear color that is ideal for florist work.

EARLY WHITE (Wigchert) 400-68

Very early pure white that should become a money maker for cut-flower growers. Grows medium tall with 6-8 open on a very neat spike.

LILAC TIME (Page 17)

TAFFETA (Page 25)

ELIZABETH THE QUEEN (White '41) 566-86

Beautiful lavender with darker lines in the throat. It has large ruffled blooms with 8 open and is one of the most beautiful glads grown. Our bulbs are without doubt some of the best in the country since they seem to grow taller spikes.

ELMER'S ROSE (Fischer '51) 462-85

A contemporary of the famous Noweta Rose, but coming from the reverse cross, and more on the rose shade. Elmer's Rose has wonderful substance, intense ruffling and sends up stretchy flowerheads, carrying 22 to 24 buds. Its color is wonderful.

ETHEL CAVE COLE (Cave '41) 440-80

This great pink has been in commerce for about twelve years and is still a splendid commercial variety. Enjoys excellent health and rates as one of the best early pink.

FESTIVAL (Hatch '52) 552-85

Very tall straight stemmed deep red. Grows 5 feet tall with a long head on which are 8-10 well placed open blooms. Certainly one of the best that has been overlooked by many. Healthy grower and fast propagator.

FIRELIGHT (Kelly '49) 436-72

Tall deep scarlet. Opens 7 five inch florets on an 18-20 bud spike. Grows up to 60 inches with a 25-28 inch flowerhead. This is very good and should be better known. One of the finest, cutting 100% good spikes.

FLORENCE NIGHTINGALE (Harris '47) 400-88

A marvelous glistening white that is 68 inches tall. Opens 6 to 8 well-placed florets on a 21 bud spike. Florets are 5½ inches across. Without a doubt the best white for both show and cut-flower purposes.

FORSYTHIA (Harris '52) 512-85

This looks like one of the finest yellows for commercial use. A tall grower that opens 6-8 well-placed florets on a well balanced spike. It is ruffled and fluted. A healthy grower that I strongly recommend.

FORT KNOX (Torrie '53) 412-80

This lovely new yellow was one of the pleasant surprises of the past two seasons. A true rival of Gold for color, with many more buds and longer flowerhead. 6-8 large ruffled florets of heavy substance open on tall stems. Will be a great commercial and show glad.

FRIENDSHIP (Fischer '49) 442-70

Lovely shade of pure pink that blends to a waxy cream throat. It is certainly one of the most beautiful varieties and a wonderful cut-flower. Very early.

GAIL (Farrington '49) 466-80

A tall, stretchy lavender that opens 7 to 9 florets of excellent attachment. Never crooks or flakes. Will become a very popular commercial since it handles very well.

GLAD TIDINGS (Arenius '52) 462-80

A lovely and distinct shade of medium rose, almost a cerise. The 6-8 open florets have practically no markings. Stems are tall. Should become a good commercial and show glad.

GLOW (Howell '46) 420-70

This is a luminous salmon-orange which is bright toward the throat. It grows 52 inches tall with a 24-inch flowerhead and opens 7 or 8 blooms at a time. It is one of the florists' favorites.

GOLD (Marshall '51) 412-80

Although Gold has only about 14 buds on a short flowerhead, it is a beautiful yellow. Color and ruffling are extremely fine. A must have for the florist trade.

GOLD BANK (Bastian '53) 410-95

Beautiful light yellow, heavily ruffled and needle-pointed. Will probably be classified 510. It opens 8-10 with 8 more showing color on a 21-bud spike. Plant is tall, about 60 inches. Beautiful in every way and will become a leading commercial as well as an exhibition variety.

GOLDEN DAWN (Savelief '51) 410-78

One of the very best clear medium yellows. Opens up to 10 well-placed florets on a tall spike. An excellent cut-flower that will win easily at the shows.

GOLDEN DIANA (Harris '53) 412-85

Another clean, clear deep yellow, with 6-8 open, 7 in color on a strong spike. Florets are ruffled, with extra heavy texture. One of the favorites with visitors to the glad fields.

GOLDRUFF (Palmer '52) 312-85

An exquisitely beautiful apricot yellow. One of the most gloriously ruffled blooms you can imagine. Opens 7-8 blooms of heavy substance, a good propagator and it is healthy. An outstanding florist and basket variety. One of our favorites.

GRATIA (De-Be '53) 576-85

Light to medium blue with a deeper blue-violet lower petal. Opens 4-5 on good spikes. A very popular variety in our garden. Makes good spikes of good height and long flowerhead.

GREY SUMMIT (Butt '50) 486-75

Fine light grey with faint pink-lavender tints showing through. Opens up to 8 on good spikes. An attractive smoky that everyone seems to like.

HARRISBURGER (Mikle '53) 552-90

A marvelous clear, deep, cherry-red; large, very tall, and a rugged grower. Opens 6 to 8 on tall spikes of 20 buds. You'll be thrilled with its huge wide-open flowers; and mammoth spikes.

HARRY HOPKINS (Salman '47) 464-85

Wine-red with a slight purple glow. We have had very good luck with this glad. It grows tall and straight with 6-8 open on every spike. 100% cutter.

HOWARD V. WRIGHT (Kadel '52) 410-82

Very light yellow or cream shading to deeper throat. Opens 7 or more large florets on fairly tall spikes. Strong healthy grower.

INVICTUS (Owens '42) 441-70

Invictus is a white that turns to a vivid pink near the heart of the flower and is climaxed by a large scarlet throat. It is one of the first spikes to bloom. A tall grower making 100 per cent good spikes.

KING DAVID (Carlson '51) 570-85

Sensational new purple. Opens 10 satin-like blooms that are recurved, winged, ruffled and fluted. A narrow silver picotee edge around the florets. This is a wonderful grower and propagator. Has a fine record of show wins.

KING SIZE (Hartman '53) 531-95

A huge medium-light pink with deeper pink throat markings. Up to 8-9 open at a time on very tall strong spikes. Certainly the giant of glads. A must for the exhibitors.

LILAC JOY (Jonkman '56)

Tall spikes of mallow purple florets with red markings in the throat—not a color that appeals to me. Opens 7-9 on 18-20 bud spike.

LOOK (Taylor '53) 540-90

A very promising new pink that should become a topnotch commercial. It opens 6-8 large flowers on tall slender spikes that are a joy to cut. One of the best in our 1953 trial gardens.

LUSTIGE WITWE (Holland '52) 371-80

A brilliant mauve or lavender with large attractive creamy-white blotches on lower petals. Opens about 5 well-placed blooms on good spikes. Somewhat like Karen. I am sure you will like this one.

LYNNE HILL (Teeple '52) 462

Very unusual color. A rose-purple with deeper throat and each petal edged with silver. Ruffled 5¾ inch florets with 8 open and 8 showing color. Height 50 inches with a 20 inch flowerhead.

MABEL VIOLET (Salman '53) 570-85

Very tall purple-violet with large flowers of a velvety sheen. Opens 6-8 very impressive flowers on strong spikes. Should be a heavy show winner when it becomes more widely distributed.

MANON (K&M) 441-80

A flesh colored pink with a large dark red blotch somewhat like Pactolus. Opens 6-8 on tall spikes. This is being overlooked and certainly is one of the finest blotch varieties for cut-flower growers.

MESA MIST (Hartman '52) 486-85

A nice light lavender-gray sort of pastel. It opens 6 to 7 large florets on a heavy well-built spike. This one is different and has made a hit at many shows. Florists have fallen hard for this since it is wonderful in baskets and make-up work.

MISSION BELLS (Milo '54) 466-70

A sister seedling of Heirloom that grows taller and has a longer flowerhead. A lightly ruffled lavender with white mid-ribs that opens 8-10 florets on a tall spike of 22-24 buds. The 4½ inch florets are firmly attached. Mission Bells is early and is a heavy producer of bulblets that grow easily.

MODERN TIMES (Salman '48) 464-75

Crimson-purple or reddish-rose. The same color as Boulogne but is a better glad in my opinion. Tall and straight grower with 6 to 8 open. For those who want a good commercial glad—and a florist favorite—we recommend Modern Times.

MOTHER FISCHER (Fischer '51) 400-85

One of the best of the new whites. Immaculately chaste, heavily ruffled, and a strong, vigorous grower. Attains wonderful height and sometimes shows a trace of pink in cool weather.

MOTHER MACHREE (Stevens '27) 480-85

One of the old time favorites—a beautiful smoky lavender shading out to a purplish red at the tips. As we expect a big demand for this old favorite we are placing a limit of 25 bulbs to a customer.

MOUNT INDEX (Miller '42) 401-68

The perfect early flowering white. The exquisitely formed florets are firmly attached and placed on very tall spikes. Opens 8. One of the very best commercial glads.

ORANGE GOLD (Marshall '45) 422-80

A wonderful glad of golden-orange shade. Will open 5 large round florets on a tall spike. Among the best of the new glads and really will win your approval.

OSTRICH FEATHER (Pfizer '50) 540-85

A huge heavily ruffled and needle-pointed pink with a deeper throat. Grows 60" tall with 8 open. This a real fine novelty that will be very popular. Also called Straus-senfeder by some.

PALETTE (Kooy '51) 437-85

Vermilion-red with sharp contrasting clear purple-blue color in throat. This is very attractive and should become very popular because it is a good grower. One of the best new novelties.

PALL MALL (K&M '54) 442-90

Medium pink with rosy cast that shows commercial promise. Florets 5¼ inches, opens 6-8 on tall spikes. Makes powerful plant growth from all sizes.

PATROL (Palmer '46) 416-77

Clear apricot with yellow throat that opens 8 florets with 8 more showing color. Tall grower with long flowerhead. Outstanding variety.

PINK CHIFFON (Fischer '53) 440-75

Early soft rosy pink that will give you one of the thrills of the early season. Spikes are of average height—opens 5-6 five inch florets on a 16 bud spike.

PINK PRIDE (Arenius '52) 541-80

Certainly a rival of King Size. This is a huge light pink with 8-10 florets open on a 20 bud flowerhead with good placement. I predict Pink Pride will win more than its share of blue ribbons.

I am writing concerning your too modest description of Ares on page 26 of your 1957 catalogue. I never get spikes with a bud count as low as 17, not to mention 15. You may be interested to know that Ares was three-spike Grand Champion at the Ohio State Show at Cleveland on August 26th-27th. All three of these spikes, which I grew and exhibited, had 23 buds. I had a section champion with Ares in single spikes in the Open Division at the Ohio State Show. At the Illinois State Show I had a section champion in three spikes with Ares. At the Souther Wisconsin-North-ern Illinois Show I had a section championship with Ares in single spikes and also a section championship in three spikes. None of these section champions had less than 22 buds. Gipsy Love is good. Made 26 buds this year.

—Dr. Earl J. Hamilton, Illinois

Melody, Cassandra and Boston are wonderful. Such good growers and gorgeous colors, mother and dad were simply thrilled when they bloomed. In the large varieties my choices are Gina and Boudoir.
